

2D Materials in Action: Energy Technologies Symposium

Dresden, Germany | October 20 – 21, 2025

Speaker Mr. Waseem Ashraf Qureshi
Title: tbd
Affiliation: Enercap Holdings

Biography:

Waseem Ashraf Qureshi, the visionary inventor and CEO of Enercap Holdings, embarked on a remarkable technological journey at the age of 16, earning the National Science Award for constructing the first UPS in 1987. From a Digital Lock for telephones in 1988 to the incorporation of Microns Electronic in 1992 and the groundbreaking development of a GPS tracking system in 1994, he has left an indelible mark on the business landscape. Over 35 years, he has consistently demonstrated an exceptional ability to innovate, contributing to transformative technologies. His leadership continues to drive Enercap Holdings forward, shaping the future of advanced energy and electronic technologies.
